FESTIVAL OF AEROMODELLING Newsletter

STRONG START FOR THE FESTIVAL OF AEROMODELLING REGISTRATION

Only two weeks after registrations opened for the Festival of Aeromodelling (4-12 July 2026), we're seeing an excellent response from the aeromodelling community across the country.

ENCOURAGING TREND - NEW ATTENDEES

One particularly positive trend emerging from early registrations is an increase in first-time attendees. This suggests the festival is successfully reaching beyond the regular event attendees and attracting new participants to the event to as far as SA and WA nationally.

AEROMODELLERS BEYOND SOCIAL MEDIA

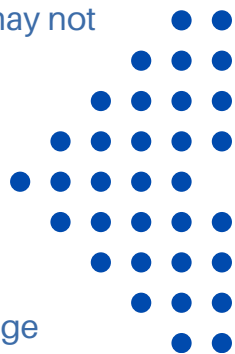

While social media has been a valuable tool for promotion, many aeromodellers remain connected primarily through their local clubs and traditional communication channels.

State Associates play an important role in helping the festival reach those members who may not regularly see online announcements.

We encourage you to help spread the word by:

- Encouraging clubs to post information on noticeboards at flying fields
- Sharing information through club newsletters and email lists
- Talking directly with experienced members who may not be active online
- Mentioning the festival at club meetings and flying days

Personal recommendations within clubs remain one of the most effective ways to encourage participation and ensure no one misses out simply because they aren't following social media updates.
